

AI Governance Readiness Toolkit - Executive Case Study

Problem: SMEs adopt AI before governance evidence is ready.

Solution: AI inventory, risk register, oversight log, supplier review, policy examples, impact assessment and generated readiness report

Outcome: ISO42001-style readiness conversations become evidence

Security posture: sample data only, no secrets, no certification claim

Portfolio value: AI Governance, Cyber GRC, EU AI Act readiness, responsible AI implementation and SME consulting communication.

Recommended use: upload to GitHub case-studies/ and link from R
